CURRENT WORK POSITION

Production Assistant *Ferndale, MI*
TinCan Cocktails

July 2025 - Current

In this position I manufacture seltzers. You can visit their website by clicking [here](#). My daily work includes brewing drinks, running them through a canning machine, packaging the drinks for distribution, and maintaining the in-house equipment.

RELEVANT WORK EXPERIENCE

MIS4100

Spring 2025

Michigan Technological University

In this college course, I worked with other students in an agile management format. We worked with a real business client, and we designed, developed, and delivered a website for them.

We defined our project scope, had weekly scrum meetings, and delegated tasks to ensure the project was completed to the client's desired specifications.

We used cloud services such as google suite to document and organize our workflow, and regularly communicated with each other asynchronously via Discord.

This course was the last of many agile management courses I took during my education at Michigan Tech. I would love to tell you more about these courses in an interview.

ACC4800

Michigan Technological University

In this course, I learned the basics of Oracle SQL and how to interact with SQL databases. I can write basic SQL queries and retrieve data from existing databases.

[Video Game Server Owner \(click here to watch a video of the process!\)](#)

April 2025 – Current

Independent Project

- **What I did:**

Set up an "SCP: Secret Laboratory" server on my laptop for the convenience of my friend group

Accounting and Auditing Intern *Bear Lake, MI*
Blarney Castle Oil & Propane

May 2024 – August 2024

- Data entry for invoices and cash receipts in A/R and A/P departments
- Understanding the functionality and dynamics of individual teams to coordinate success
- Operating DM2 and PDI Accounting Systems
- Auditing the records of convenience stores
- Filing of paper accounting documents and paper invoices

Grounds Maintenance *Arcadia, MI*

May 2021 – August 2023

Arcadia Bluffs Golf Club

- Landscaping and turf maintenance of the bluffs golf course

Customer Service *Bear Lake, MI*

July 2019 – August 2020

Papa J's Ice Cream and Eatery

- Taking orders and operating the register
- Making ice cream orders and serving them to customers

Operating Systems

Personal Experience

For over a decade I have been a passionate PC gamer. I've built my own PC and I've spent hundreds of hours modding games, tinkering with settings in both Windows and Mac OS, as well as producing music, sharing files, and so much more. I have a deep love for all things IT. One of the best feelings is the triumph felt from spending hours troubleshooting a problem, and finally figuring it out. In second place comes the feeling you get when someone you know has the same problem, and you help them solve it. IT is a passion of mine, and I hope I can build a long career in the industry.

ACADEMIC EXPERIENCE

Relevant MIS Courses: *Business Process Analysis, Intro to Business Programming, Systems Analysis and Design, Team Dynamics, Organizational Behavior*

- Understanding of the Internet of Things (IoT)
- Programming skills in Python and Java
- Entry-level skills in SQL database queries
- [Using AI to automate excel spreadsheets using visual studio code \(another video!\)](#)

Other Relevant Courses: *Quantitative Problem Solving, Operations and Supply Chain Management, International Economics, Principles of Economics, Principles of Finance*

- Proficient in Excel for budget optimization and profit maximization
- Knowledge of global economic impacts of tariffs and world trade
